

Direct Connection with The Home Depot

New Update to the API Connection

We are excited to announce that we are launching a new and updated Direct Connection to The Home Depot.

Currently using The Home Depot's Vendor Portal to submit your content?

Here's the Salsify difference. Using Salsify, you will be able to:

- Combine multiple IDM quicksheets into one publish, reducing time to market and decreasing cycle time
- Centralize all of your product content and validate it against The Home Depot's requirements
- Submit your new items to The Home Depot with the push of a button
- **NEW!** Update content on The Home Depot using the Direct Connection instead of Quicksheets
- Submit data at the Item and Super SKU levels, including supply chain data (packaging hierarchies)
- Use the Salsify Readiness Report to ensure your data is ready to publish and avoid mistakes that impact your speed to market time
- Receive notifications and feedback from IDM right in your Salsify account
